

2022 SUMMARY REPORT

Commercial Feed Inspections

PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED

Missouri Department of Agriculture Mission Statement

To serve, promote, and protect the agricultural producers, processors, and consumers of Missouri's food, fuel, and fiber products.

The Missouri Department of Agriculture (MDA) Plant Industries Division, Bureau of Feed and Seed (Bureau) assists the state's feed industry and consumers through inspection and product testing as well as providing information to assist in making buying decisions. The Summary Report of 2022 Commercial Feed Inspections includes data from over 1,093 inspections and over 31,000 laboratory tests. This report is provided as an annual review of the bureau's responsibilities and accomplishments and as reference material.

In 2020, the program was recognized by FDA as reaching full implementation of the Animal Food Regulatory Program Standards (AFRPS). Full implementation of the AFRPS standards was the culmination of 5 years of work and made possible by a \$3,000,000 FDA grant. This grant made it possible for the Missouri Department of Agriculture Feed Control Laboratory to become ISO/IEC 17025 accredited. This establishes a quality management system for the laboratory. We believe these successes represent significant contributions to the Missouri Department of Agriculture's achievement of its mission: "To serve, promote, and protect our agricultural producers, processors and consumers of Missouri's food, fuel and fiber products."

In 2022, the Bureau worked to obtain the objectives of two FDA Cooperative Agreement grants. One of the grants is a five year \$1,500,000 grant to maintain compliance with the Animal Food Regulatory Program Standards. The other grant is a five year, \$1,500,000 grant to build capacity to inspect animal food facilities for compliance with the Current Good Manufacturing Practices (CGMP) and the Preventive Control (PC) Rule for Animal Food under state authority. This will assure that state inspection personnel will be conducting PC and CGMP inspections in the state. The grant funds will increase program regulatory capacity and pivot the program to more of a focus on food safety.

One of the significant emphases of the PC grant is to educate small and mid-size firms on the requirements of Preventive Control Rule. The training was provided this year to a select group of feed manufacturers to assist in identifying hazards that can occur in the manufacturing process. This education is projected to assist as many as a 140 feed facilities within the state. Another major objective of PC Grant is to provide training for the inspection staff to conduct PC and CGMP inspections.

The Bureau has six staff trained to conduct inspections under (21 CFR Part 507) as part of the Food Safety Modernization Act. Staff inspected Missouri feed facilities to review the practices of manufacturers and/or distributors of feed products containing prohibited mammalian protein in compliance with Federal Rule 21 CFR Part 589. These inspections are designed to make sure no prohibited protein is fed to ruminant animals. In 2022, the Bureau performed 9 BSE inspections.

The Bureau continues to serve Missouri Agriculture by conducting contract inspections for FDA. In 2022, a greater number of comprehensive inspections were elected in order to maximize effectiveness and efficiency within Missouri feed facilities. The comprehensive inspection model includes inspecting a single facility under every applicable FDA animal food regulation, for which the current contract allows. In 2022, program staff conducted inspections in 71 Missouri feed facilities. Nine of those inspections were conducted covering Part 507 Current Good Manufacturing Practices (CGMP) and Preventive Controls (PC); one inspection was conducted covering Part 507 CGMP, exclusively. Three comprehensive medicated feed mill inspections were conducted at federally licensed medicated feed establishments. An additional 13 comprehensive medicated feed mill inspections were conducted at firms not requiring a FDA medicated feed mill license. Eight facilities were inspected for non-licensed medicated feed mill requirements, exclusively (non-comprehensive). Nine facilities were inspected covering Veterinary Feed Directive (VFD) and Bovine Spongiform Encephalopathy (BSE) requirements. Eleven Trace-Forward/Trace-Back inspections were conducted with Veterinarians and Producers as a result of prior VFD inspections. Lastly, visits were conducted with six facilities to determine operational status of current FDA inventoried firms. These inspections are a vital part of the food safety initiative for all animal feed. The program ensures food facility hazards are properly evaluated and controlled, legally approved levels and combinations of drugs are used in feed products and each facility's procedures, records, labeling and other practices are in compliance with current FDA regulations.

Food safety is addressed in the bureau's annual survey of corn produced in the state. In addition to providing test information to manufacturers for crude protein levels, the bureau tests for aflatoxin, fumonisin, vomitoxin and zearalenone. If corn is found containing toxin levels exceeding FDA guidelines for safe use for livestock, notifications are sent immediately to the facility at which the corn was sampled. Toxin levels in corn were generally low in Missouri corn in 2022.

The Bureau of Feed and Seed inspectors responded swiftly to ten complaints in 2022 about the quality or safety of feed or seed. When problems required testing beyond the scope of the program or the capabilities of the Missouri Feed Control Laboratory, other agencies were utilized or samples were sent to other laboratories for testing.

The Bureau of Feed and Seed took regulatory action against unlicensed companies or those who failed to file tonnage reports. Those actions are reported in "Violations Other Than Failure to Meet Label Claims."

In 2022, inspectors collected 3,908 samples of finished feeds and feed ingredients. The collected samples were tested for adherence to label guarantees, resulting in 31,607 individual assays in 2022. If testing revealed a deficiency or excess from the guaranteed analysis or something of a detrimental nature, a Withdrawal from Distribution Order was issued

immediately. There were 451 withdrawals issued in 2022, for a statewide compliance rate of 86.56%. A total of 268 service and complaint samples were analyzed in 2022.

The Missouri Feed Control Laboratory analyzed five customer-formula samples in 2022. Customer-formula feeds are those for which the customer has designed his own ration and asks for specific ingredients in specific quantities to be blended by the manufacturer. Each customer requesting the feed, as well as the manufacturer of the feed, received an analytical report showing nutrient levels found in the sample.

The Excellence in Compliance Award Program recognizes feed companies who have achieved at least 89.5% adherence to label guarantees on five or more samples tested by the laboratory. The companies must also be up-to-date with all fees and reporting. Ninety-six companies qualified for the award in 2022. Fifty of those are located in Missouri.

PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED
PERSONNEL & INSPECTOR AREAS

Administration

Paul Bailey, Director Plant Industries
Stan Cook, Program Manager, Feed & Seed
Mary Koestner, Quality Assurance Manager
Julie Campbell, Pet Food Coordinator
Eileen Pierson, Administrative Support Professional
Devra McNeely, Lead Administrative Support Assistant
Klarissa DeOrnellis, Administrative Support Assistant
Laura Schaefer, Administrative Support Clerk

Feed Laboratory Staff

Melissa Nichols, Senior Laboratory Scientist
Abbey Stieferman, Senior Laboratory Scientist
Luke Malinksi, Senior Laboratory Scientist
Sheila Schaffer, Senior Laboratory Scientist
Jamie Minter, Laboratory Scientist

Missouri Department of Agriculture

To serve, promote, and protect the agricultural producers, processors, and consumers of Missouri's food, fuel, and fiber products.

U.S. Food and Drug Administration Guidelines for Aflatoxin Levels

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Class of Animal	Commodities
20 ppb	Dairy animals, animals not listed below, or unknown use	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients
20 ppb	Immature animals	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal
20 ppb	Pets (dogs, cats, rabbits, etc.) of all ages	For corn, peanut products, cottonseed meal, and other food ingredients and complete pet food
100 ppb	Breeding cattle, breeding swine, and mature poultry (e.g. laying hens)	For corn and peanut products
200 ppb	Finishing swine (100 pounds or more)	For corn and peanut products
300 ppb	Beef cattle, swine, poultry (Regardless of age or breeding status).	For cottonseed meal
300 ppb	Finishing beef cattle (e.g. feedlot cattle)	For corn and peanut products

U.S. Food and Drug Administration Guidelines for Fumonisin Levels

Corn and corn by-products containing less than 5 parts per million fumonisin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn and corn by-products exceeding 5 ppm can be fed only for specific species, age, and production stage. The recommended maximum levels for fumonisin in animal feeds that FDA considers achievable with the use of good agricultural and good manufacturing practices are presented below. FDA believes that controlling fumonisin to these recommended levels can reduce exposure to fumonisin that may be found in corn products intended for animal consumption.

Class of Animal	Commodities & Portion of Diet	Levels in Corn & Corn By-products (in parts per million)	Levels in Finished Feeds (in parts per million)
Equids and rabbits	For corn and corn by-products not to exceed 20% of diet **	5 ppm	1 ppm
Swine and catfish	For corn and corn by-products not to exceed 50% of diet **	20 ppm	10 ppm
Breeding ruminants, breeding poultry and breeding mink*	For corn and corn by-products not to exceed 50% of diet **	30 ppm	15 ppm
Ruminants < 3 months old being raised for slaughter and mink being raised for pelt production	For corn and corn by-products not to exceed 50% of diet **	60 ppm	30 ppm
Poultry being raised for slaughter	For corn and corn by-products not to exceed 50% of diet **	100 ppm	50 ppm
All other species or classes of livestock and pet animals	For corn and corn by-products not to exceed 50% of diet **	10 ppm	5 ppm

*Includes lactating dairy cattle and hens laying eggs for human consumption

**Dry weight basis

2022 Corn Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2022, the average crude protein for corn was 7.45%, higher than 6.70% in 2021's corn crop. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. 148 samples were tested for aflatoxin. Only 12 positive results were found. Zero samples tested to be in the 10-20 ppb range, one in the 20-49 ppb range, three in the 50-99 ppb range, three in the 100-199 ppb range, two in the 200-299 ppb range and three which tested greater than or equal to 300 ppb range. Seventy-eight samples were tested for fumonisin. Twenty-six positives were found; zero in the 0-5 ppm range, fourteen in the 5.1-10.0 ppm, eleven in the 10.1-20 ppm range, one in the 20.1-30 ppm range and one with a greater than or equal to 30.1 ppm result.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

Excellence in Compliance Award

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 90% rounded average compliance in 2022. Those companies are listed below.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the Missouri Feed Control Laboratory in 2022.
- A 90% passing compliance rate on five or more samples must have been achieved for the 2022 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed, retain a Missouri Commercial Feed License, and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 96 feed labelers have achieved a 90% or better compliance rate in Missouri in 2022.

Fourty-Four of these companies maintain an address in the state of Missouri and 52 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

Miscellaneous Products	279,704
TOTAL	4,902,976

SECTION ONE

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.

SECTION TWO

Section 2 lists regulatory actions taken on violations other than failure to meet the guarantees. Violations of the law other than not meeting guarantees include: failure to obtain a Missouri Commercial Feed License, failure to pay inspection fees, negligence in revising the labeling, and failure to label the feed as required by law and as requested by the Missouri Department of Agriculture.
